

## Junior Quality Assurance Engineer

full-time position | Belgrade office (Serbia)

The **IPS Global Group (IPS)** is a rapidly growing international software company headquartered in Munich, Germany. **IPS** provides advanced, specialized, and valuable solutions to customer organizations worldwide to transform data into real-world intelligence for critically important business and technical decisions.

In 2024, **IPS** was acquired by **Megger**, a global leader in electrical testing and measurement. From power generation to the power outlets in your home, **Megger** products cover almost every application within the Electrical Supply Industry.

**Megger** designs safe, reliable, and user-friendly portable water and electrical test equipment, ensuring safe energy use worldwide. With operations in over 100 countries and a team of 1,500 employees, **Megger** offers comprehensive customer service, including software, product design, training, repairs, and consultancy.

Do you want to contribute to the digital future? Thanks to further growth, we are looking for a **Junior Quality Assurance Engineer** to support our partner **Megger** on interesting projects

### Your Responsibilities

- › Reviewing and analyzing software requirements
- › Developing detailed, comprehensive, and well-structured test plans and test cases
- › Executing tests using suitable methodologies (manually or using test automation tools)
- › Documenting test procedures, test results, and other relevant artifacts
- › Work closely with product development team to ensure timely delivery of the new features
- › Timely reporting on the testing status, flaws and identified issues
- › Participation in Agile Scrum and design meetings
- › Contributing to process improvements and quality initiatives within the team

### Your Energy

- › Degree in Computer Science, Information Technology or equivalent technical degree
- › Minimum 2 years as QA or Test Engineer
- › Good understanding of QA processes and software development lifecycle
- › Experience with test automation tools: Playwright, Cypress or Selenium
- › Experience in any programming/scripting language, TypeScript preferred

- › Knowledge of functional and non-functional test methodology
- › Basic understanding of CI/CD and version control: Git
- › Experience working in an Agile/Scrum development process
- › Good verbal and written communication skills
- › Team player skills

## What we offer

- › An interesting and varied position in a world-leading, internationally active company where you will have the opportunity to be involved in projects worldwide
- › A hybrid work environment, giving you the flexibility to work both remotely and in the office
- › Annual leave allowance of 30 days, ensuring a healthy work-life balance
- › Private health insurance as part of a comprehensive benefits package designed to support your well-being
- › Culture of trust, teamwork, empowerment, and constructive feedback
- › Possibility for further career advancement in a successful growing company
- › Your development – our commitment: career opportunities based on each profile and supporting each employee to achieve their professional and career goals
