

# It's a mobile leak detection department and a must for every municipality

## Leak detection van With incorporated office compartment and wet room

### Description

When on the road, you can be sure that you have all the necessary equipment for managing and maintaining your pipe network at hand with a SebaKMT leak detection van. You can transport high-quality measuring equipment such as correlators, listening equipment, noise loggers, line location equipment, etc. quickly, effectively and correctly. All your equipment is then within easy reach, whenever it's needed.

The van is divided into two sections. The front area accommodates the SebaKMT "Mobile Office". This contains all the main features that you need to work efficiently and in comfort while on the road – from seating, work surfaces & a wardrobe through to drawers and cupboards. An additional battery, both modern and powerful, ensures that all your equipment has an independent power supply. In the rear of the vehicle, the so-called wet room, the emphasis is on safety and ergonomics. This section contains shelving with drawers and cupboards to store equipment and tools securely and accessibly. The shelving can be expanded to meet individual customer requirements.
